

QXCI Information for Health Professionals

Quantum Biofeedback is based on decades of scientific research in the fields of energy medicine and bio-physics. Doctors and healthcare providers improve their ability to focus in on causes of dis-ease and treat illness, specific to their patients particular capacities and sensitivities. Patients who've spent months or years seeking relief from their symptoms will receive practical information that they can use right away to help themselves.

Quantum Biofeedback is a very useful tool with which to show the impact of behavior, choices and imbalances on an individual's well-being. The biofeedback system provides a non-intrusive method to acquire immediate feedback for items that support the body and those that overwork the body.

The Quantum Biofeedback system helps to clear dissonant energy patterns, resulting in a reduction of tension, stress and pain in the body. Patients with chronic fatigue, Lyme, hormonal imbalance, sleep disturbances, chronic pain and a myriad of other complaints have reported remarkable improvements.

Quantum Biofeedback supports numerous other therapies and treatments by addressing the very subtle energetic levels of health and healing. It provides professionals with an effective tool with which to discuss stress reduction with their clients. It is used successfully in cooperation with chiropractic, dental, acupuncture, nutrition, massage, and countless other health practices.

Physicians and health professionals who refer patients will receive biofeedback analysis reports that can assist in honing in on their patients' concerns. Biofeedback sessions include discussions of the various stressors and lifestyle factors identified in the QXCI analysis and a plan of support according to specific recommendations from the analysis. Patients are supported throughout their treatment process, empowered and able to take more responsibility for their own health.

Quantum Biofeedback demonstrations are available for interested health care professionals for a possible referral source or to integrate the quantum biofeedback system into their own practice.
